This non-GAAP financial measure should not be considered as an alternative to net income (determined in accordance with GAAP) as an indicator of the Company's performance, or to cash flows from operating activities (determined in accordance with GAAP) as a measure of the Company's liquidity, nor is it indicative of funds available to fund the Company's cash needs or available for distribution to shareholders. It should be noted that the Company's manner of calculating this non-GAAP financial measure may differ from the calculations of similarly-titled measures by other companies. Management believes that it is useful to consider Adjusted Income because the adjustments are non-cash items that do not necessarily reflect an actual change in the long-term economic value or performance of our assets. Management considers this non-GAAP financial measure as supplemental information to net income in analyzing the performance of our underlying business. Depreciation and amortization and impairment of assets exclude adjustments from discontinued operations of \$57 and \$524, respectively, for the three months ended September 30, 2013 and \$258 and \$920, respectively, for the nine months ended September 30, 2013. Depreciation and amortization includes our proportionate share of depreciation and amortization expense relating to equity method investments and excludes the portion of depreciation and amortization expense allocable to non-controlling interests. For the three and nine months ended September 30, 2013, loss on early extinguishment of debt excludes the portion of losses paid in cash of \$11,514.
